 US East/New York: July 23, 2024 at 12:00 PM  
 UK/London: July 23, 2024 at 5:00 PM

## ABOUT THE WEBINAR

The [TOMNET](#) and [TBD](#) University Transportation Centers are pleased to present the Time Use, Travel, and Telework Dashboard ([T3D](#)), an open source web-based platform that provides access and convenient analysis capabilities for the American Time Use Survey (ATUS) data series. Featuring dedicated pages for time use, travel, and telework, T3D empowers users to explore patterns and trends, conduct within-year and between-year analyses, and perform cross-segment studies for a comprehensive understanding of evolving trends in how Americans allocate their time, work, and travel on a daily basis. Join us for a webinar to learn more about the T3D platform and its many features and capabilities. The webinar will be presented by Dr. Irfan Batur, the principal investigator for the T3D development project, and moderated by Dr. Ram Pendyala with a special commentary by Dr. Steven Polzin.

### Time Use

### Travel

### Telework
