## TRANSPORTATION CAREERS IN LOCAL AGENCIES: A VISIT TO AUSTIN'S MOBILITY MANAGEMENT CENTER

*Open to All Students Interested in Transportation!*

Join us at the City of Austin's Mobility Management Center (MMC) for an in-depth look at modern traffic operations and the city's innovative approaches to managing mobility. This exclusive visit, hosted by Austin's MMC in partnership with UT Austin's Travel Behavior and Demand Center, offers a unique opportunity to learn directly from professionals shaping transportation in our city. Through guided tours and presentations on traffic operations, signal timing, Vision Zero safety, and planning/GIS, students will gain practical insights and explore career pathways in the evolving and extremely relevant field of transportation. By connecting with city staff and industry experts, you'll deepen your understanding of real-world challenges and solutions that influence urban mobility today. Don't miss this chance to see how transportation careers are making an impact!

**ALLISON  
RICHEY, P.E.**

As a Traffic Management Center Manager for the City of Austin, Allyson leads a dedicated team of 8 professionals, specializing in both signal operations and maintenance. Her role encompasses incident and special event management, where she expertly coordinates and addresses complex traffic situations to maintain efficient operations. With a strong focus on signal timing and ensuring the reliability of traffic control systems, she enhances overall traffic flow and safety. Her ability to navigate multi-organizational coordination is crucial, as she works closely with various agencies and stakeholders to tackle diverse traffic-related challenges and streamline communication across all involved parties. She works for Kimley-Horn, a national transportation consulting firm. Allyson got her Bachelors in Civil Engineering at the University of Arkansas.
